

Heavy Duty 20AWG Ultra-Durable D-sub Cables

L-com, Inc. has released new 20AWG (American Wire Gauge) D-subminiature cables, designed ultra-durability due to the heavier wire. 20AWG conductors will also allow for maximum current to pass through the cable.

The cables are available in male-to-male and male-to-female versions, with DB9-, DB15-, and DB25-style molded connectors on the ends. In addition to the thicker conductors, the connectors will also be double-shielded to help reduce electromagnetic interference (EMI).

For more information about this release, please contact: Dave Fallon, Internet Marketing Strategist at 978-682-6936 x1450, newsletters@L-com.com
