

U.FL Connectors For WRT Series Antennas In 868MHz and 916MHz

Antenna Factor's WRT Series antennas in 868MHz and 916MHz are now available with U.FL/MHF compatible connectors. WRT Series antennas with U.FL/MHF compatible connectors are small and tamper-resistant, which makes them good for applications such as wireless vending and traffic equipment. WRT Series antennas cost less than \$7.00 each in production quantities. Custom colors are available for volume OEM customers.
