

High Power Density DC-DC Converter Modules

Power Sources Unlimited announces the Traco Power TEP 150WI series with input filter module.

The filter module is now available on standard assembly together with the TEP 150WI DC-DC converter module.

The input filter module is designed to meet high EMC demands like conducted noise in accordance to EN55022 class B and increased burst and surge immunity without external components.

The assembly makes a design in very easy with a free mounting location concerning EMC considerations.

Deliveries range from stock to 8-10 weeks and are competitively priced under \$215.00 in OEM quantities for the TEP 150WI-F series DC-DC & input filter module assembly.
