

# Power Amplifiers for RF Conducted Immunity Testing

Com-Power is excited to announce a new line of RF power amplifiers for IEC 61000-4-6 conducted immunity testing up to 250 MHz. Three models are available with 25, 50 and 100 Watts power output. Com-Power also has comprehensive line of Coupling decoupling networks (CDN) required to test for these standard. Com-Power will also be introducing accessories such as loads, directional couplers and attenuators for a complete test solution. Please visit the following links for more information.
