

Amphenol Connector Series Offers High Corrosion Resistance

WDD Staff

[Amphenol Industrial Global Operations](#) [1]

(Sidney, NY) has expanded its Starline EX and Amphe-EX series of connectors to offer a higher level of corrosion resistance for use in the most harsh environments. Designed for hazardous ATEX and IECEx applications, these rugged connectors feature:

- A design with exceptional mating properties.
- Availability in high grade 316 stainless steel.
- Flameproof.
- Zone 1 approval.
- An operating temperature range from -20° to +55°C (T5 and T6 ratings available).
- Power up to 1,135 A @ 1,000 V (Starline EX).
- A dielectric strength of 1,800 V (Starline EX).
- Small wire gauges of 11 – 28 AWG (Amphe-EX).
