

HyperLink HGV Series Antennas Provide Excellent Value

WDD Staff

[L-com, Inc.](http://www.L-com.com) [1] (North Andover, MA) has added new HyperLink brand omnidirectional antennas for the 4.9-5.8 GHz band that are small, lightweight, and indoor/outdoor rated. The new HGV series antennas are economical but maintain the high performance standards that the HyperLink brand is known for. Features include:

- Sealed collinear brass elements inside a durable UV-stable machine gray fiberglass radome.
- A vented end cap and drain holes in the base that help prevent moisture build-up inside the antenna.
- A mast mounting kit for masts up to 2.0" in diameter.
