

RLC Electronics Expands STR-2 Series

WDD Staff

[RLC Electronics Inc.](#) [1] (Mt. Kisco, NY) has announced the expansion of the Terminated Single Pole Double Throw switch (STR-2 series) with a new 50 GHz version using 2.4 mm connectors. This model is optimized for excellent RF performance and features:

- An insertion loss of 1.1 dB max.
- VSWR 2:1 and an isolation of 50 dB.
- Standard operating modes that are failsafe and latching with self, cut-off.
- TTL driver and indicators available.
- Applicability in high-frequency test and measurement where excellent RF performance is necessary.
