

Fox Electronics Enhances Xpresso Line

WDD Staff

[Fox Electronics](#) [1] (Fort Myers, FL) has enhanced its innovative Xpresso line of low jitter configurable oscillators with the Xpresso-TC, a new TCXO version with custom frequencies up to 250 MHz. Additional features include:

- A tight frequency stability of ± 2.5 ppm.
- An operating temperature range of -40° to $+85^{\circ}\text{C}$.
- Custom frequencies up to 250 MHz.
- A typical max frequency of 50 to 60 MHz.
- Applicability in medical monitoring and measurement, telecommunications and networking, and military communications.
