

Richardson RFPD Introduces New CloudGate M2M Gateway

WDD Staff

[Richardson RFPD, Inc.](#) [1] (LaFox, IL) has announced immediate availability and full design support capabilities for a new CloudGate M2M gateway from Option. The CG0192-11897 CloudGate M2M gateway provides competitively priced LAN to WWAN routing and GPS functionality in a single SKU unit that utilizes the Option Gobi3000 multi-mode module, and is certified on all major US cellular operators (CDMA/EV-DO and WCDMA/HSPA+). The CloudGate automatically resolves problems associated with wireless M2M connectivity and incorporates two hardware expansion slots for RS232 and WiFi functionality. Key features include:

- Supports the 800-850/900/1900/2100 MHz and AWS (1700/2100 MHz) frequency bands.
- Automatic connection monitoring and error recovery.
- Secure, redundant firmware and configuration images.
- Unique software and hardware configuration flexibility.
- Automatic provisioning of custom middleware.
