

Touchstone's New Micropower Op Amps

WDD Staff

[Touchstone Semiconductor](#) [1] (Milpitas, CA) has announced that it has added two new micropower operational amplifiers (op amps) to its “NanoWatt Analog” high-performance analog integrated circuits portfolio: the TS1003 and TS1005, both available in SC70-5 packaging and ready to ship from Digi-Key, Touchstone Semiconductor’s authorized distributor. The TS1003 and the TS1005 feature:

- Single-supply operation of 0.8 to 5.5 V.
- A low supply current.
- An operating temperature range of -40° to +85°C.
