

Tuned Frequency Absorbers from RFMW

WDD Staff

[RFMW Ltd.](#) [1] (San Jose, CA) has announces design and sales support for a new line of microwave absorbing materials from MAST Technologies. These “Tuned Frequency” absorbers are electrically optimized for specific applications and intended for customers who experience high-frequency cavity resonance effects or high-frequency EMI emissions above 18 GHz. Features include:

- Halogen free and RoHS compliance.
- Absorption @ 20.6 GHz.
- Availability with or without a pressure sensitive adhesive backing.
- Standard sheet size of 24” x 24” and 12” x 12”.
