

KOA Speer's 2 W TLRH3AW Metal Plate Chip Current Sense Resistor

WDD Staff

[KOA Speer Electronics](#) [1]

(Bradford, PA) announced that their TLRH3AW metal plate chip current sense resistor now features an extended resistance range of 10 ~ 270 mΩ with greater corrosion protection and higher temperature resistance up to +170°C. The TLRH3AW provides resistance to extreme temperatures, as well as to thermal and mechanical shock, moisture and vibration. The TLRH series is AEC-Q200 qualified and available with lead-free terminations to meet EU RoHS requirements. Features include:

- Metal foil technology.
- Thickness as low as 0.5 mm.
- Allows for a 2 W power rating in a 2512 package size.
- TCR of ± 75 ppm in 10~22 mΩ, ± 50 ppm in 24~270 mΩ, in a 1% resistance tolerance.
