

## B&B Electronics' M2M Connectivity Equipment Passes NEMA TS2

WDD Staff

[B&B Electronics Manufacturing Company](#) [1] (Ottawa, IL) has announced that a broad range of its M2M connectivity and data communications equipment has passed the NEMA TS2 standard environmental requirements, making them safe and reliable for use in Intelligent Transportation System (ITS) networks. A standard for traffic control assemblies, such as traffic lights, emergency road condition signs, and walk/don't walk signs, the NEMA TS2 is designed for manufacturers to meet or exceed a minimum set of environmental requirements, including Ethernet Extenders daisy chain traffic control cabinets from intersection to intersection and 10g's of shock. Features include:

- An operating temperature range from -34° to 74°C with 18 to 95% humidity.
- Ability to withstand 0.5 g @ 5 to 30 Hz vibration.
- Ethernet switches, fiber media converters, serial isolators, ethernet extenders, ethernet routers, and wireless communications equipment.
