

Harwin Adds New Datamate Options for Extra Design Flexibility

WDD Staff

[Harwin](#) [1] (Salem NH) has

increased the flexibility of its industry-recognized 2 mm pitch Datamate hi-rel connector family with new versions. The company now offers its single-in-line, surface mount version in vertical configuration, while the recently-announced extra-small bore product is now available with jack screws for extra mating security. Features include:

- Three mating options: Friction latch, locking latch or without latches.
- 28-32 AWG extra small bore contact targets avionics, aerospace, industrial, and robotic applications.
- Jack screws ensure contact is maintained even in environments with are subject to severe shock and vibration.
