

## **WAGO 2007 Series Current Transformer Disconnect Terminal Blocks Simplifies Current Transformer Testing**

WDD Staff

The new TOPJOBS current transformer disconnect terminal blocks from [WAGO Corporation](http://www.wago.us) [1] (Germantown, WI) simplify current transformer testing, as well as increase safety, within power monitoring applications. Designated the 2007 Series, these CT disconnect terminal blocks:

- Feature an intuitive orange 3-position (Operating, Shorting, and Measuring) disconnect lever.
- Have a compact footprint of 90 (L) x 8 (W) mm.
- Reduce panel space by up to 55%.
- Feature touch-proof design that does not require a separate cover to be installed.
- Ensure wiring accuracy.
- Are available in through or ground connection versions.
