

Standex-Meder Electronics SX41 Series Planar Transformers

WDD Staff

[Standex-Meder Electronics](#) [1] (Cincinnati, OH) has announced the SX41 Series of planar transformers for

500 W to 2 KW applications. Available in standard or custom designs, the SX41 delivers high performance for power conversion applications in the welding, automotive, telecommunications, renewable energy, and aerospace industries. Compact yet powerful, these transformers feature:

- Enhanced core design to promote volumetric efficiency and thermal performance.
- Large core surface promotes heat transfer while minimizing AC resistance and proximity Cu loss.
- Optimized core cross section lowers core loss.
