

Engineering Update #2: Revolutionary Self-Healing Wires

Eric Sorensen, Coordinator of Multimedia Development

Our second newscast for Electronic Component News is brought to you by [Mouser Electronics](#) [1], the electronic components distributor with the widest selection of the newest products. In this episode of Engineering Update, we're discussing new research into larger, safer lithium ion batteries, revolutionary self-healing and self-assembling wires using liquid metal, the bay bridge becomes the world's largest light sculpture, and printing your own animatronic robot!
