

Meaghan's Minute: Bluetooth-Enabled Bath Fan

Eric Sorensen, Coordinator of Multimedia Development

Today on Meaghan's Minute, brought to you by [Memory Protection Devices](#) [1], [Homewerks Worldwide](#) [2] has introduced a [Bluetooth enabled ventilation bath fan](#) [3] that streams music wirelessly in home bathrooms.

It connects to most Bluetooth enabled smartphones, tablets, and laptops from up to 30 feet away, and after the initial set-up, the fan connects to devices automatically when it's in range of the speaker.

What a great addition for homes for those of you who love singing in the shower.

For more information visit memoryprotectiondevices.com [1].
