

HotSeat Episode 10: Single-Mode LTE Modules

Alex Shanahan, Multimedia Production Specialist, WDD

For this HotSeat interview, Craig Miller, vice president of marketing for [Sequans Communications](#) [1] sits down with WDD to discuss single-mode LTE modules for tablet and mobile computers. He provides the unique features of Sequans modules versus other modules on the market, and provides his opinions on what is driving the growth of the single-mode LTE module market. Craig even discusses the benefits for both wireless designers and wireless operators who chose to use these modules.
