

Meaghan's Minute: Ultra-Battery Energy Storage

Eric Sorensen, Coordinator of Multimedia Development

Today on Meaghan's Minute, brought to you by [Memory Protection Devices](#) [1], Australia's Commonwealth Scientific and Industrial Research organization has developed an [UltraBattery](#) [2], a new dimension in lead acid battery technology.

UltraBattery combines the fast charging rates of an ultra-capacitor technology with the energy storage potential of a lead acid battery technology in a hybrid device with a single common electrolyte.

Combining these two technologies in one cell mean that UltraBattery works efficiently in a partial state of charge.

For more information, visit <http://www.ultrabattery.com> [2].
