

Theory and Application of RF/Microwave Absorbers Explored

Submitted by Guest (not verified) on Wed, 02/08/2012 - 11:46am

Emerson & Cuming Microwave Products announces the release of its newest white paper, "Theory and Application of RF/Microwave Absorbers". This white paper explores the theory and application of microwave absorbers.

Virtually every component of a microwave system uses absorbers. Proper choice of absorber materials is a cost effective way to enhance design. This paper highlights relevant equations for absorber operation and several common applications. It also includes a survey of the different types of absorbers (magnetic, dielectric, foam, elastomer, etc.) as well as a description of absorber test methods.

Check out the white paper [HERE](#) [1], or download for free at www.eccosorb.com [2] under Resource Center.
